This is because a cough or anosmia can last for several weeks once the infection has gone. The 10-day period starts from the day when they first became ill. the school community			<p>positive for coronavirus (COVID-19). Schools should contact the local health protection team. This team will also contact schools directly if they become aware that someone who has tested positive for coronavirus (COVID-19) attended the school – as identified by NHS Test and Trace.</p> <ul style="list-style-type: none"> <li>• The health protection team will carry out a rapid risk assessment to confirm who has been in close contact with the person during the period that they were infectious, and ensure they are asked to self-isolate.</li> <li>• The health protection team will work with schools in this situation to guide them through the actions they need to take. Based on the advice from the health protection team, schools must send home those people who have been in close contact with the person who has tested positive, advising them to self-isolate for 14 days since they were last in close contact with that person when they were infectious. Close contact means: <ul style="list-style-type: none"> <li>• direct close contacts - face to face contact with an infected individual for any length of time, within 1 metre, including being coughed on, a face to face conversation, or unprotected physical contact (skin-to-skin)</li> <li>• proximity contacts - extended close contact (within 1 to 2 metres for more than 15 minutes) with an infected individual</li> <li>• travelling in a small vehicle, like a car, with an infected person</li> </ul> </li> <li>• The health protection team will provide definitive advice on who must be sent home. To support them in doing so, we recommend schools keep a record of pupils and staff in each group, and any close contact that takes places between children and staff in different groups (see section 5 of system of control for more on</li> </ul>	M	X

Schools do not need to ask pupils to record everyone they have spent time with each day or ask staff to keep definitive records in a way that is overly burdensome.</p> <ul style="list-style-type: none"> <li>• Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self-isolating subsequently develops symptoms. If someone in a class or group that has been asked to self-isolate develops symptoms themselves within their 14-day isolation period they should follow 'stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection'. They should get a test, and: <ul style="list-style-type: none"> <li>• If the test delivers a negative result, they must remain in isolation for the remainder of the 14-day isolation period. Their household should self-isolate for at least 14 days from when the symptomatic person first had symptoms, following 'stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection'</li> <li>• Schools should not request evidence of negative test results or other medical evidence before admitting children or welcoming them back after a period of self-isolation.</li> <li>• Further guidance is available on testing and tracing for coronavirus (COVID-19).</li> </ul> </li> </ul>	M	X
